

Bachelor's Thesis in Physics

Investigation of Methods for the Standalone Measurement of the Drift Velocity in a CMS Drift Tube Chamber

written by

Justus Samuel Tacke

Submitted to

Physics Institute III A
RWTH Aachen University

Supervisor: Univ. Prof. Dr. rer. nat. Alexander Schmidt
Second Reviewer: Dr. rer. nat. Kerstin Höpfner
Advisors: Dr. Dmitry Eliseev
Nils Esper

Contents

Abstract	i
1 Theory	1
1.1 Theoretical background	1
2 Particle detection	2
2.1 Fundamentals of Particle detection	2
3 The Drift Tube System	3
3.1 The LHC	3
4 Triggerless measurement of electron drift velocity in the Drift Tube System	4
4.1 Experimental setup	4
4.2 Data processing	5
5 Summary and outlook	6
5.1 Summary	6
5.2 Outlook	6
A Appendix A	7
A.1 Additional Plots	7
A.2 Additional Tables	7

Chapter 1

Theory

1.1 Theoretical background

Chapter 2

Particle detection

2.1 Fundamentals of Particle detection

Chapter 3

The Drift Tube System

3.1 The LHC

Chapter 4

Triggerless measurement of electron drift velocity in the Drift Tube System

4.1 Experimental setup

4.2 Data processing

Chapter 5

Summary and outlook

5.1 Summary

5.2 Outlook

Appendix A

Appendix A

A.1 Additional Plots

A.2 Additional Tables
